

PreZero US

Reducing Waste & Increasing Revenue through
Innovations in Reverse Logistics

July 14, 2021

OUR COMMITMENT is to:

- Provide best in class recycling services
- Help companies meet their waste diversion goals
- Transform PCR resins to new retail bags and e-commerce mailers
- Upcycle food waste into nutrient-rich animal feed and fertilizer

OUR MISSION

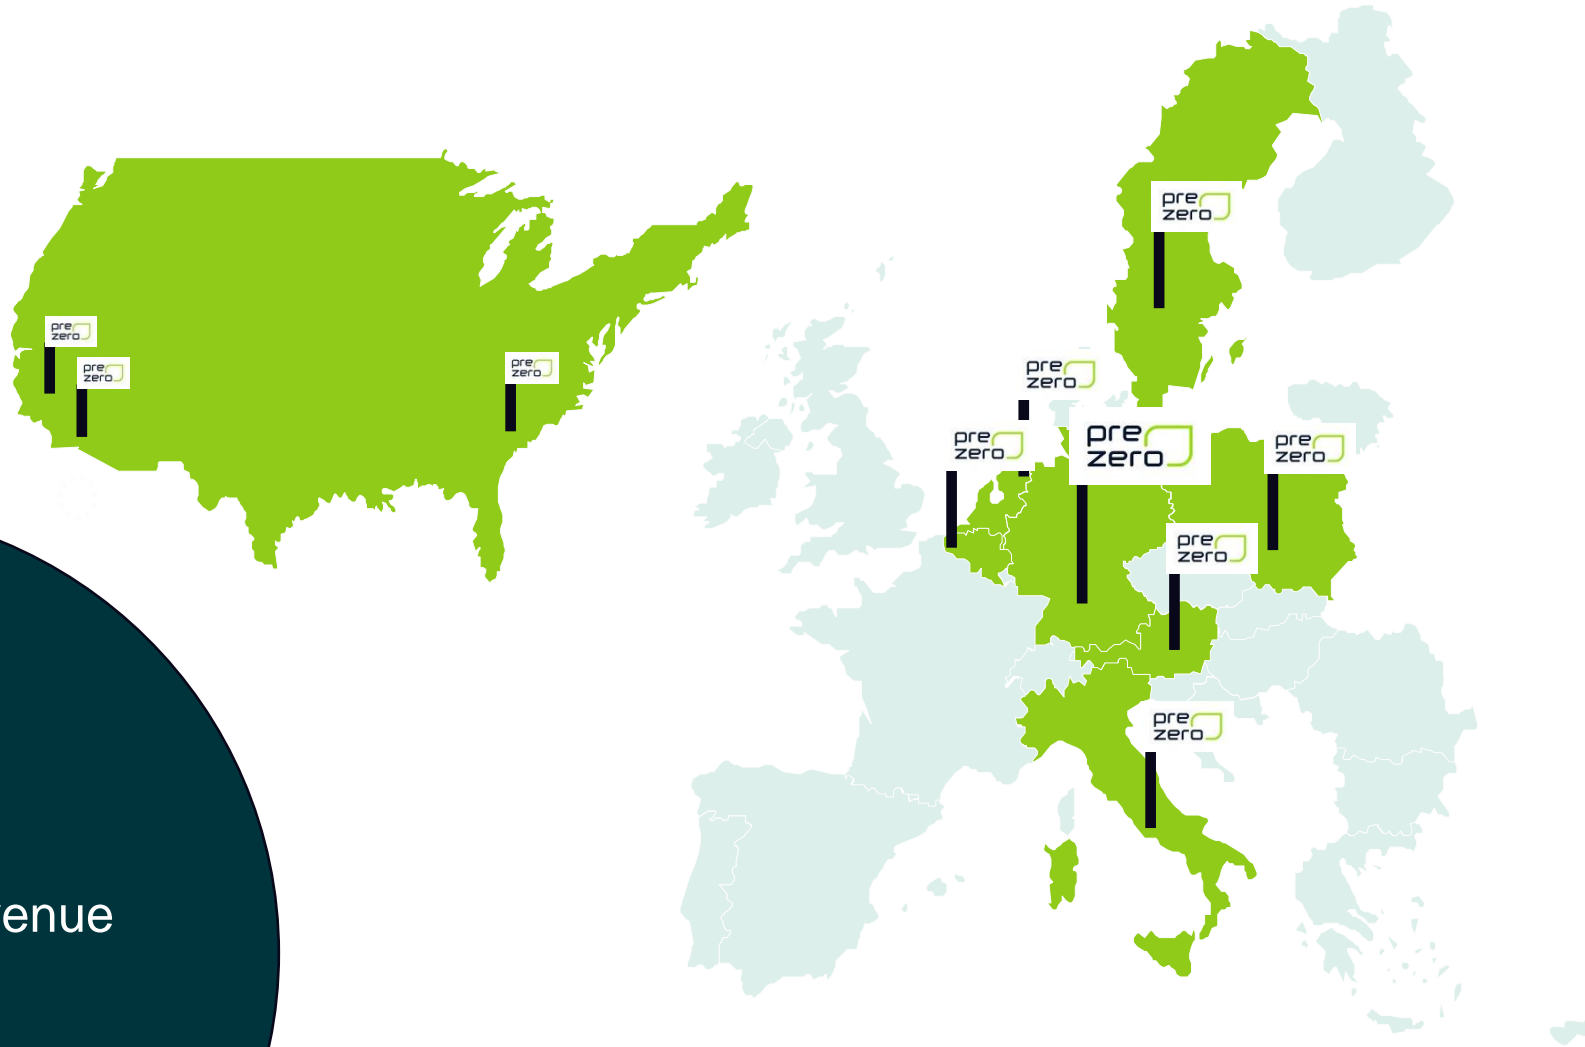

With our innovative environmental services, we close loops and thereby preserve resources

OUR VISION

New thinking for a cleaner tomorrow

PreZero's Global Footprint

PreZero

MORE THAN:

\$600M Annual Revenue

9 Countries

13,000 employees

280 sites

Nationwide Locations

Northern CA: Oroville

Agency

Food Recovery Hierarchy

Reclaiming Value

LDPE CAPACITY: 24,000 tons/yr
MRP CAPACITY: 56,000 tons/yr
FOOD CAPACITY: 150,000 tons/yr

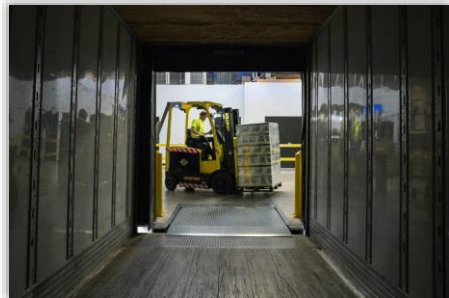

- With these processes, we have developed the domestic infrastructure for effective large scale recycling programs in the US
- The only missing piece is the material from retail businesses like yours!

Reverse Logistics Programs

Deliver newly made plastic items to customer warehouse

Load up newly made retail or e-commerce bags at PreZero facility

Pick up baled materials from customer warehouse

Deliver customer plastic waste to PreZero facility and recycle it.

pre zero
Efficiencies Created by utilizing back hauls

- Reduce number of trucks coming in/out of business
- Increase dock time efficiency
- Reduce number of empty trucks on the road
- Reduce carbon footprint

Real Life Case Study

Big Box Store

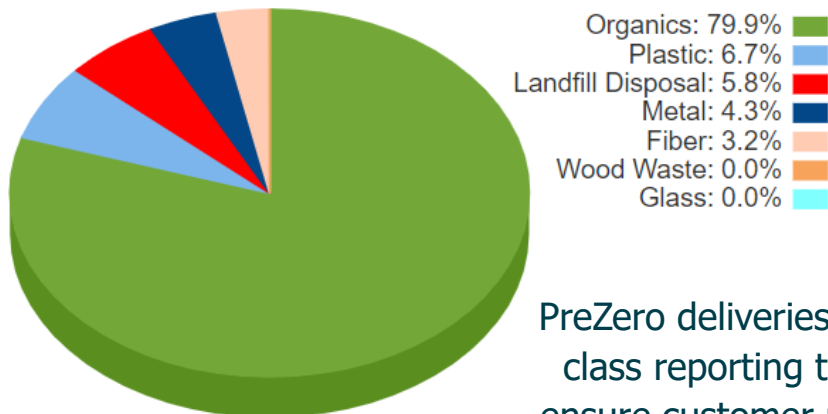

- Southern California based
- Over 70 locations

Loads of goods are delivered by a third-party vendor to our client

A variety of our client's recyclables are then live loaded onto that same delivery truck and are backhauled to PreZero's facility

PreZero deliveries best in class reporting to help ensure customer reaches diversion goals

Recyclables are offloaded, weighed, recorded, processed onsite or stored until sent to End User. Some plastics and food waste are processed onsite

What's Next?

Do you have a direction for your recycled materials goals?

- We can help set goals and meet existing ones

How accurate and reliable is the reporting you receive from your current provider?

- PreZero provides the data your business needs to adapt and improve.

Is your waste diversion optimized?

- We provide seamless logistic solutions that are tailored to your business.

Is your company in-tune with new and pending legislation across the industry?

- We work closely with industry associations and advocate on behalf of circular economy solutions

→ Your business likely needs post-consumer resins or has recycled materials goals, and we need this material back to close the loop.

Help us to help you!

New thinking for a
cleaner tomorrow.
